

Hudson Valley CCA

RENEWABLE HIGHLANDS

If you live in Beacon, Cold Spring, Fishkill, Marbletown, Phillipstown, or Poughkeepsie, this program could effect your electric bill

Your Town/City is exploring an opportunity to participate in this program with other municipalities in the area. If your municipality signs on to the program, all residents who are currently supplied by Central Hudson will be **automatically** enrolled in this program and your energy supplier will change. Community Choice Aggregation (CCA) allows New York homes and businesses to join together to see less expensive, cleaner electricity through their city/town/village leadership. The Town of Fishkill is exploring this opportunity with some of our neighboring municipalities.

Customers supplied by Central Hudson will be automatically enrolled and their electricity supplier will change to the reputable company selected by the participating communities. Customers may freely opt-out or leave the program at any time. Everyone will remain a Central Hudson customer for deliver, repair and billing.

Please join representatives from the CCA Partner organizations on any of the informational sessions below for more information. Time will be allotted at each session for question and answers.

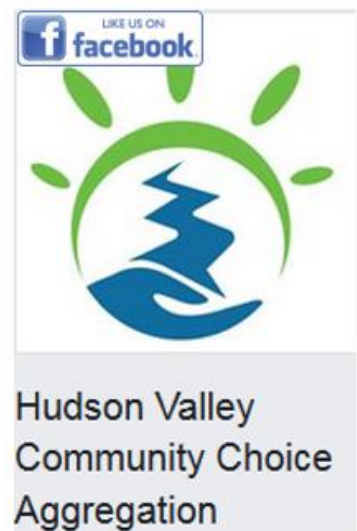

Come to our public Q & A Informational Sessions:
